Introduction

BF. ECO.

Blobfisher Ecosystem is group of NFT collections and a meme token oriented around our memelord, blobfish. Our NFT collections are only on Stargaze.zone and meme token is built on Chihuahua Chain.

Blobfisher Ecosystem is a rewarding ecosystem for their community members, blobfishers. We are organizing various prized social events to boost our community culture. We expand our universe with newer NFT collections and conduct airdrop campaigns for blobfishers. We use our NFT collections to fund our meme token and we airdrop our meme token to our NFT supporters.

We created a sustainable loop to reward blobfishers and we are always working to find new ways.

Distribution Model

BF. ECO.

\$BLOBBY belongs to our community. We created it with this motto and this is why we reserved 92% of the supply to us blobfishers and other %8 is for the marketing and budget reserved for marketing will be used to bring more investors into **\$BLOBBY**.

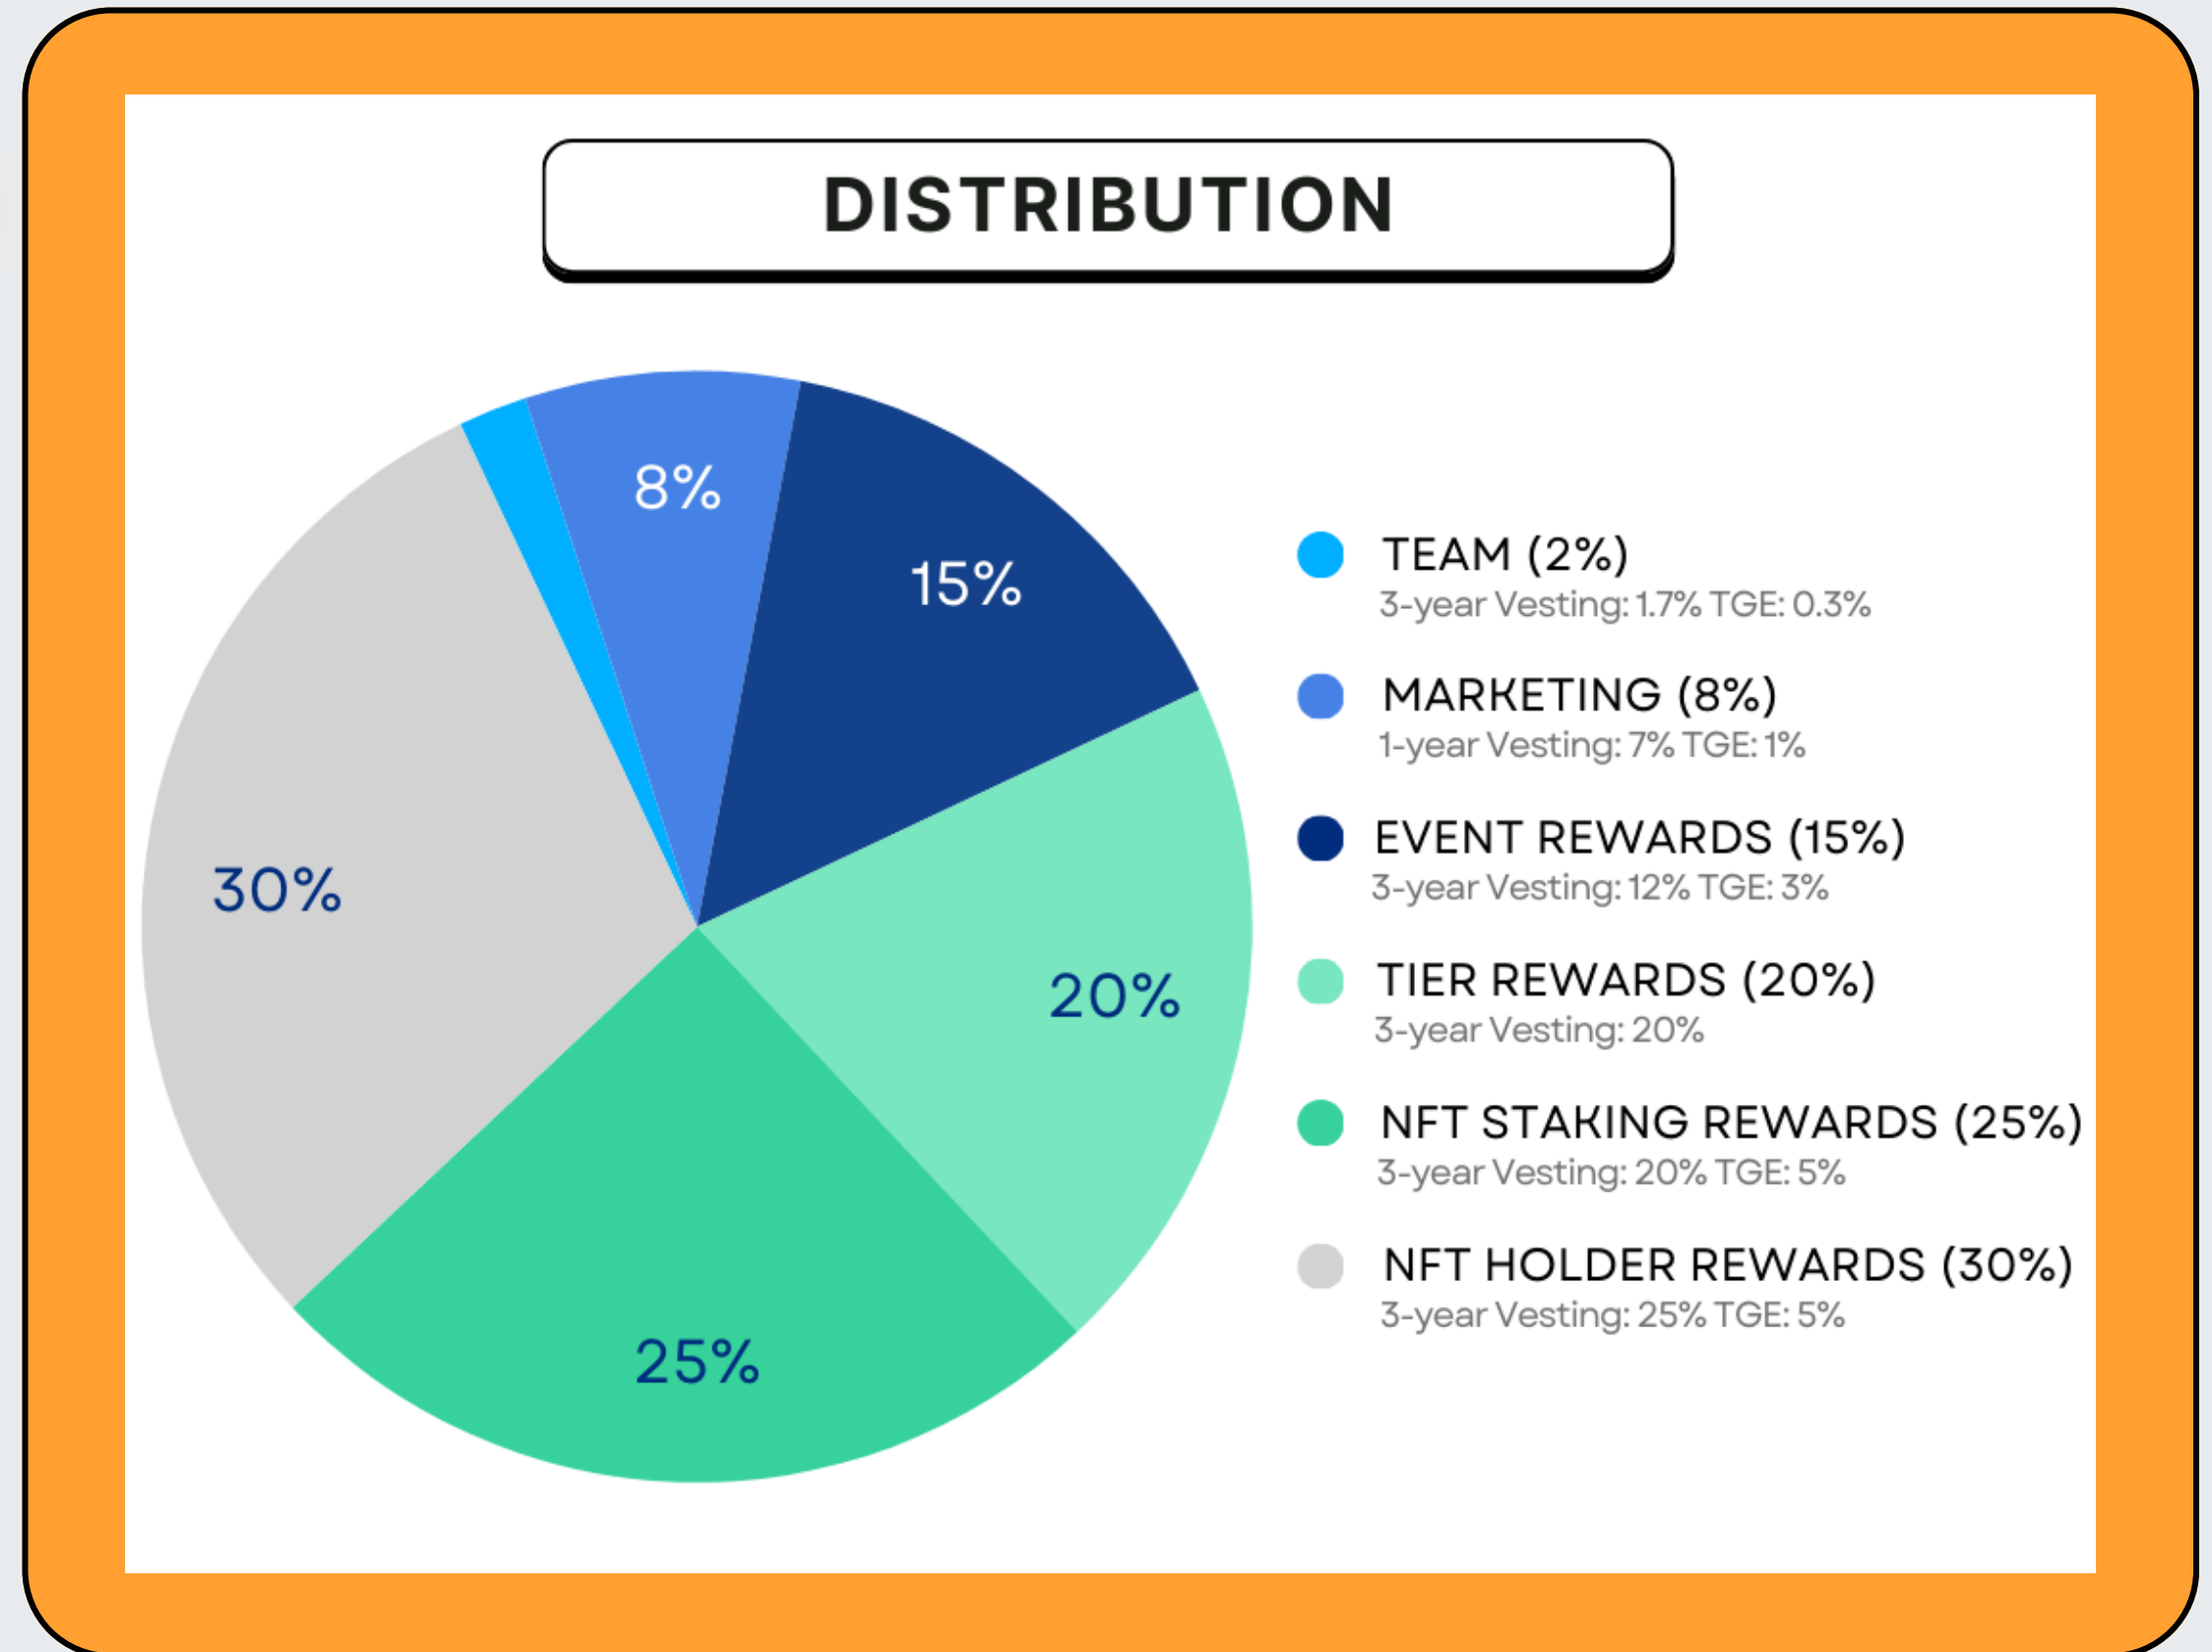

No token allocation is reserved for project's treasury. We will buyback from the market regularly to raise a treasury for the project.

We planned 3 years linear vesting program for **\$BLOBBY** distribution. This will give us more controlling over the token price. We won't let token price to tank. Also we will have more time to create more liquidity and funds for buybacks of our token.

We will also make more collaborations with other projects and give them a chance to get their share from **\$BLOBBY** allocation.

Distribution
